Summary

2x certified Senior Software Engineer with 7+ years of experience designing, modernizing, and scaling enterprise applications using NodeJS, C#, JavaScript, TypeScript and the .NET ecosystems. Strong expertise in Postgres, Microsoft SQL Server, MySQL with proven ability to analyze and refactor legacy systems into modern, maintainable architectures.

Experienced in building enterprise solutions, developing high performance APIs, and handling large scale transactional systems in fintech environments. Skilled in system design, data migrations, and distributed architectures, with hands on experience in cloud platforms (AWS, Azure) and CI/CD pipelines.

Adept at debugging complex systems, improving code quality, and leveraging AI assisted development tools such as Github Copilot to accelerate delivery while maintaining engineering standards.

- **Backend:** Node.js, .Net Core, TypeScript, .Net Framework, JavaScript, Asp.Net, REST APIs, TopShelf, Worker Service, TDD (xUnit, nUnit, Jest, Mocha, Supertest), Express.js, NestJS.
- **Frontend:** ReactJS, Next.js, Angular, HTML, CSS, JavaScript
- **Cloud & DevOps:** AWS (Lambda, EC2, S3, RDS, SNS, Elastic Beanstalk), Azure (App Service, VMs, Blob Storage), Docker, CI/CD pipelines
- **Databases:** PostgreSQL, MongoDB, MySQL, MSSQL, Redis, Oracle
- **Messaging & Event Systems:** RabbitMQ, Redis Pub/Sub Project Management &
- **Collaboration:** Jira, Trello, Azure Boards, Slack, Microsoft Teams

Experience

Senior Software Engineer

FCMB Group

Mar 2024 – Feb 2026

- I worked in a team which managed these applications: Smecollect, Business Zone, Financial Authentication Service (FAS) etc
- Led the backend team that managed smecollect, a cash collection application where businesses can be onboarded and can receive payments for the service(s) they offer. The application handles incoming HTTP webhook requests through an idempotent API endpoint, ensuring that payment transactions are processed reliably with full ACID compliant database guarantees. The application was deployed using a Kubernetes cluster with 5 instances scaled out horizontally. This was built using .Net Core, Entity Framework, Topshelf, MSSQL, Restful APIs, GIT and brought in a total revenue of 15 billion naira to the bank in its first year.
- I was also in a team that managed the Business Zone (<https://businesszone.fcmb.com/>) platform. This platform is a comprehensive suite developed by First City Monument Bank (FCMB) to support both individual users and SME owners. It integrates various external services (e.g Zoom API, Azure CDN, Azure Blob Storage) aimed at enhancing business operations, providing educational content, and fostering professional development.
- Mentored junior developers in microservices architecture, REST API best practices, and database optimization on platforms like Codebar.io, Zoom meetings.
- Leveraged AI assisted development (Claude, ChatGPT) tools to accelerate implementation, debugging, and code quality improvements

Senior Software Engineer

Smart Power Billing (Sterling Technologies)

Apr 2022 – Mar 2024

- Managed a small team that worked on these applications: QuikPay, Diaspora Billing, Quikcash, ERPs applications for organizations like BEDC, EEDC and Geometric (APLEs)

- Designed and built high-scale backend services using Kafka ,TypeScript and NestJS, supporting a distributed financial platform serving 15M+ users and 10+ billions in monthly transaction volume
- Architected and maintained event-driven systems (Kafka, Redis Pub/Sub, RabbitMQ), implementing producer/consumer workflows, asynchronous processing etc
- Modeled and optimized PostgreSQL databases, including schema design, indexing strategies, and query tuning to improve performance under heavy load
- Implemented caching and rate-limiting strategies using Redis, improving system responsiveness and reducing database load
- Designed systems for scalability and resilience, incorporating idempotency, horizontal scaling patterns, and fault-tolerant processing for financial transactions
- Worked in containerized environments (Docker) and collaborated on scalable deployment strategies aligned with cloud-native principles
- Collaborated with cross functional teams to deliver features end to end, consitently contributing to frontend development using React, Next.js, ContextAPI, Redux.

Software Engineer

First Bank of Nigeria Ltd.

Feb 2021 - Feb 2022

- Contracted to First Bank Nigeria by Lonzec Technologies where I led a two man team in the development of a distributed service based application, which automates inter bank disputes resolution which resolved more than 90% of disputed transactions daily using C#, Asp.Net, JavaScript, Reactjs, MSSQL, Git.
- Spearheaded the management of the application server, Windows Server 2016 using Powershell scripts and IIS

Software Engineer

Jensiv Limited

Sep 2018 - Dec 2020

- Collaborated with a team of developers and operations to launch ScenicPlots, a mobile based app for storytellers to showcase stories to movie producers, agents, and streaming networks
- Initially using Xamarin(C#) then migrating to JavaScript and React Native for the Mobile, Python (Django) for the back-end , Git and MySQL, Deployed Containerized application to Heroku, supporting 1000+ published stories and 100+ registered writers in West Africa.

Education

Middlesex University

Bachelor of Science - BS, Computer Science

2015 - 2018

Licenses & Certifications

ADSE - APTECH Computer Education (2015)

AWS Certified Cloud Practitioner - AWS (2025)

AWS Certified Solutions Architect - AWS (2026)
